

E-Safety Advice for Parents

Roblox App

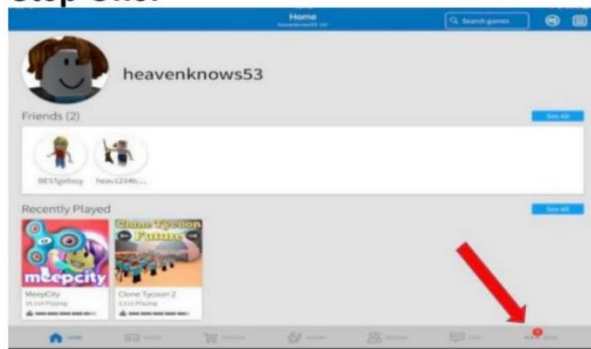

E-Safety is always of paramount importance at Town Farm and remains an on-going priority. Please be aware that within the ROBLOX app there is a messaging facility for users to communicate with others. This part of the app causes concern in its ability to keep children safe from online abuse. There is no way to screen contacts on the app, so the children can be contacted by anyone who is playing the game. This will include other children/adults who they do not know.

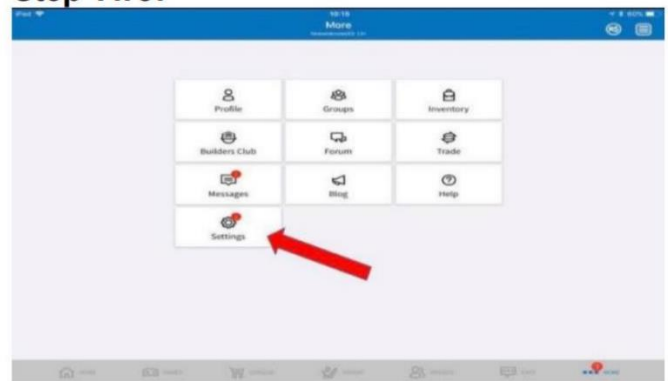

If your child uses this app, we recommend that you regularly check who they have made friends with. It is also highly recommended that parents/carers regularly check their child's 'in game' message inbox to ensure no inappropriate messages have been sent to your child. Having conversations with your child from an early age about using the internet safely will reinforce the learning that takes place in school and help children to link this learning with home.

For further communication protection, please check your app privacy contact settings in the following way:

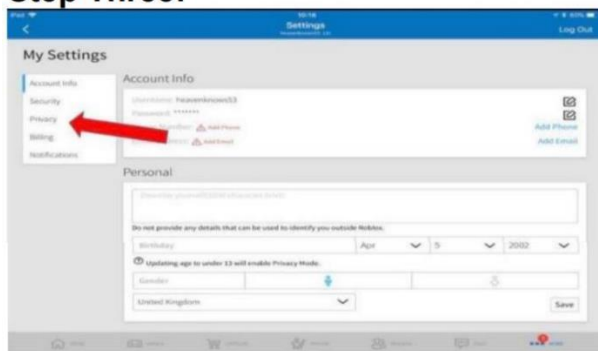

Step One:

Step Two:

Step Three:

Step Four:
